THE THEOSOPHIST.

VOL. VIII. No. 85.—OCTOBER 1886.

सत्यात् नास्ति परो धर्मः ।

THERE IS NO RELIGION HIGHER THAN TRUTH.

[Family motto of the Maharajahs of Benares.]

ANCIENT MAGIC IN MODERN SCIENCE.

PAULTHIER, the French Indianist, may, or may not, be taxed with too much enthusiasm when saying that India appears before him as the grand and primitive focus of human thought, whose steady flame has ended by communicating itself to, and setting on fire the whole ancient world*—yet, he is right in his statement. It is Aryan metaphysics† that have led the mind to occult knowledge—the oldest and the mother science of all, since it contains within itself all the other sciences. And it is occultism—the synthesis of all the discoveries in nature and, chiefly, of the psychic potency within and beyond every physical atom of matter—that has been the primitive bond that has cemented into one corner-stone the foundations of all the religions of antiquity.

The primitive spark has set on fire every nation, truly, and Magic underlies now every national faith, whether old or young. Egypt and Chaldea are foremost in the ranks of those countries that furnish us with the most evidence upon the subject, helpless as they are to do as India does—to protect their paleographic relics from desecration. The turbid waters of the canal of Suez carry along to those that wash the British shores, the magic of the earliest days of Pharaonic Egypt, to fill up with its crumbled dust the British, French, German and Russian museums. Ancient, *historical* Magic is thus reflecting itself upon the scientific records of our own all-denying century. It forces the hand and tires the brain of the scientist, laughing at his efforts to interpret its meaning in his own materialistic way, yet helps the occultist better to understand modern Magic, the rickety, weak grandchild of her power-

* ESSAY. PREFACE by Colbrooke.

† It is only through Mr. Barthelemy St. Hilaire that the world has learnt that "with regard to metaphysics, the Hindu genius has ever remained in a kind of infantile underdevelopment!"
